clinicubes CTMS

4 reasons to Stop Using Spreadsheets for Trial Data Collection
And Start Implementing CTMS

A good CTMS:

ENSURES SECURITY OF DATA **1**

- Secures designated roles for each user registered in the system
- Allows authorities to make role-based access
- Delivers more protection & hinders data manipulation

2 MAKES ERRORS VISIBLE

- Finds "invisible" errors
- Allows authorities to add constrains to the fill-out forms
- Sets specific criteria to the fill-out forms

OFFERS CENTRALIZED LOCATION **3**

- Stores the entire data in one centralized location
- Minimizes loss of data
- Standardizes the entire process

4 IMPROVES WORKFLOW

- Follows the logical steps of the study & related protocols
- Eases workflow by connecting various specialist
- Benefits decision making & data approval
